User Journey for Scenario #2

Jessica has just arrived back on campus and wants to eat with a group other than soccer teammates

On the homepage, Jessica switches her status to "seeking a meal" She also browses through the open meals on the page.

Homepage

Shows all available places to eat on campus

Location Selection

Jessica first opens the location selection page to view details about the Sadler center.

Gives location details and general overview of todays menu

Location

From quickly browsing the meals being served at Sadler, the food sounded fine but Jessica goes back to Location selection to choose the Commons.
The commons is having a German theme meal + the reviews are not great.

Home page

After seeing the poor reviews at the commons, Jessica updates her status once more to denote she's interested in eating at Sadler.

Supports messaging with other friends to convey plans.

Friends

At this point, she gets a message from her friend Suzi, who is interested in grabbing dinner with her. They message eachother + meet there in 5 minutes. Halfway through the meal, Justin sees their meal on the meal page + messages Suzi that he's coming to join them.

Gives nutrition info, photos, ratings, and reviews.

Dish

At the conclusion of the meal, Jessica had enjoyed the meat-patties so much that she left a review in the form of a haiku on the Dish page. She also gave them a 5 star rating.
